

QThread

```
classDiagram
    class QThread
    class GpgFrontend_UI_VersionCheckThread["GpgFrontend::UI::VersionCheckThread"]
    GpgFrontend_UI_VersionCheckThread --|> QThread
```

The diagram illustrates a class hierarchy. At the top is the 'QThread' class, represented by a rectangle divided into three horizontal sections. The top section contains the class name 'QThread', while the bottom two sections are empty. Below 'QThread' is the 'GpgFrontend::UI::VersionCheckThread' class, represented by a rectangle divided into three horizontal sections. The top section contains the class name, the middle section lists two attributes, and the bottom section lists two methods. A blue arrow with an open triangular head points from the top of the 'GpgFrontend::UI::VersionCheckThread' class to the bottom of the 'QThread' class, indicating inheritance.
